1. Launch Windows Live Mail

2. Select **Accounts** from the top menu bar and then the **Email** icon from the top left

Create new account

3. Enter the **email address** and **password**, then ensure that the **Manually configure server settings** checkbox is ticked

Configure server settings

4. Select "**POP**" as the Server type.

      Enter **mail.united.net** in the Incoming server address.

      Enter **smtp.united.net** in the Outgoing server address

5. Ensure that the **Logon user name** is your entire email address and click "**Next**"

Complete Setup

6. Once prompted, you can complete the setup by clicking "**Finish**".

7. If your email is still not working, call tech support at **1-800-779-2227**
