

1. Launch Windows Live Mail
2. Select **Accounts** from the top menu bar and then the **Email** icon from the top left

Create new account

3. Enter the **email address** and **password**, then ensure that the **Manually configure server settings** checkbox is ticked

The screenshot shows the 'Add your email accounts' window in Windows Live Mail. The window has a blue title bar with the 'Windows Live Mail' logo and a close button. The main content area has a light blue gradient background. At the top, the title 'Add your email accounts' is in a large green font. Below it, a message says 'If you have a Windows Live ID, sign in now. If not, you can create one later.' with a link 'Sign in to Windows Live'. The form is divided into two columns. The left column contains: 'Email address:' with a text box containing 'you@your-domain.com' and a link 'Get a Windows Live email address'; 'Password:' with a masked text box and a checked checkbox 'Remember this password'; 'Display name for your sent messages:' with a text box containing 'Name Surname'; and a checked checkbox 'Manually configure server settings'. The right column contains: 'Most email accounts work with Windows Live Mail including' followed by a list: 'Hotmail', 'Gmail', and 'and many others.'. At the bottom right, there are 'Cancel' and 'Next' buttons.
